Our Vision

SMEK aims to be the forefront innovator in Cyber-Intelligence Consultancy, strategically positioned to lead and shape the landscape within the SADC. Grounded in the principles of disruptive strategy, we seek to align with market trends, embracing emerging technologies, and anticipating customer needs to provide cutting-edge solutions

- ❖ **Accessibility and Inclusivity:** We endeavour to make **cyber security services** accessible to **a broad audience**, offering **cost-effective alternatives**.
- ❖ **Customer-Centric Solutions:** To provide **custom services** for private and public sectors, and SMEs, **targeting the unique needs** in each segment
- ❖ **Innovation:** Our aim is to reform cyber security through sustainable **innovations** in intelligence, AI, and machine learning
- ❖ **New Markets:** SMEK understands the role of digital economies of the region. We aim to **lead in mobile device services security**.
- ❖ **Strategic Partnerships:** SMEK will seek to **leverage strategic partnerships** and **regional expertise** to deliver contextually relevant solutions.

We have a commitment to maintaining the highest standards of quality, professionalism, and ethics in all your engagements. We prioritise the confidentiality and security of our customer's information

/What We Do

We provide expert guidance, ensuring best practice and digital governance. We prioritise the confidentiality and security of our customer's information.

You can access capabilities from a catalogue of services to ensure quality as your organisation utilises IT services.

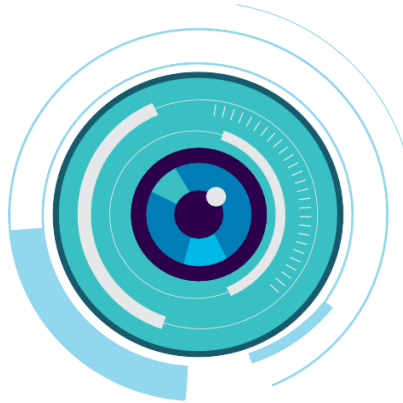

/Our Services

/Cyber security

We identify and assess cyber security threats for public and private sectors. Deploy multi-layered capabilities including malicious insider threat management, deliver training, and support compliance and regulatory requirements.

We will help your organisation develop robust security plans and deploy effective security controls from day one.

/Risk Monitoring

We will help you navigate risks through tailored consultation, analysis, and forecasting services. This including risk management, due diligence, and trend analysis.

We provide recommendations for specific projects and ongoing strategic analysis.

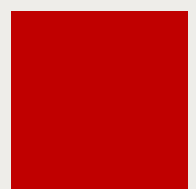

/Advisory

SMEK embraces rapid internet penetration in the region. We aim to be your long-term partner providing contextual and strategic services to counter the unique security threats with the diversity of our customers in mind.

SMEK will leverage strategic partnerships and expertise to provide contextually relevant advisory, fostering growth and success.

We deliver personalised consultation either in-person or through our online platform. SMEK has significantly invested in these competences and practices to meet your need. We prioritise the confidentiality and security of our customer's information

SMEKCyber

/Our Services Cyber Security

Proactive & effective incident response.

Continuous learning to stay at the forefront

/Cyber Security Services

ATaaS

Our Awareness Training as a service (ATaaS) offering helps you elevate your cybersecurity posture by empowering your workforce and creating a security conscious culture within your organisation.

Digital Forensics

Ensure integrity of your digital assets with SMEK's digital forensic investigation service. We will help you navigate the complexities of digital data with documentation of findings. We are qualified expert witnesses.

DPaaS

Get Data Protection Officer as a Service (DPaaS) to get that peace of mind on data protection and privacy preservation issues. Our experts will help you to understand your data landscape and the steps you need to take to comply with data protection laws and regulations.

Insider Threat Management

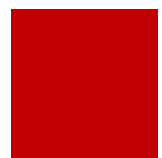

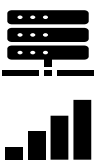

We integrate traditional intelligence tradecraft with cutting-edge cyber expertise to protect against data loss and reputational damage involving insiders acting maliciously, negligently, or unknowingly. Let SMEK help you manage threats posed by users with authorised access to your systems, networks, or data.

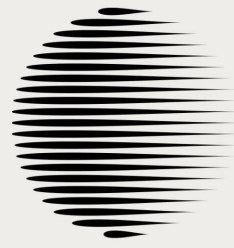

Remote Monitoring

We will simplify software updates and patching, intelligently monitor your devices and network with very minimal false positives. We rely on cutting-edge remote monitoring technologies to discover, monitor and analyse your network.

Risk Management

From the onset, we will conduct a comprehensive security assessment to understand your current security posture, assess your level of risk and recommend risk mitigation strategies customised to your context. We will guide your implementation of security controls to minimise future risks.

SMEKCyber

/Our Services Risk Monitoring

We prioritise the confidentiality and security of our customer's information. We have a commitment to maintaining the highest standards of quality, professionalism, and ethics in all your engagements.

/ Risk Monitoring Services

Due Diligence & Trend Analysis

Our team of trained experts will conduct thorough research and gather actionable intelligence that supports informed decision-making. We will provide comprehensive reports, forecasts, potential scenarios, what happens next and how your organisation can manage and plan for open future-focused questions.

Risk Assessment

We conduct in-depth analysis of factors impacting your organisation, including governance, and regulatory environments. We help you identify potential risks and opportunities. Our Team will provide actionable insights and strategic recommendations to mitigate risks.

/ Our Services Advisory

We have a commitment to maintaining the highest standards of quality, professionalism, and ethics in all your engagements.

/ Advisory Support

Plan ahead

Get expert guidance to formulate tailored security blueprints, ensuring proactive threat mitigation and strategic planning. We will help you define security goals, establish policies and procedures, and develop playbooks and incident response plans to suit your context.

Test your strategy

Let our experts premortem test your strategic outlook, develop new frameworks based on your future organisational aspirations and assess the performance of your strategic outlook.

Build in-house Capability

Our team of trained experts will help you develop in-house frameworks and playbooks to support strategy formulation. We can develop tailored training for your workforce. SMEK has translation partnerships to meet your language requirements.

Insights

We provide insights that shun groupthink and bias and bring clarity and confidence to your strategic decisions.

SMEK Cyber

We are a homegrown consultancy, with deep cultural and language knowledge of the region. Our strong roots and understanding of the economic and cultural dynamics of the region give us that edge – we understand the practical and social role of our services. .
